The Difference Over 50 Years of Success

W. Ralston is now a part of the Inteplast Group, one of the largest manufacturers of Can Liners in North America. Established in the 1960's, W. Ralston has become Canada's market leader in waste management solutions for over 50 years. Our dedication to Quality, Service, Consistency and Innovation has been our top priority since the beginning.

Our steady growth has allowed us to expand across Canada into two manufacturing facilities in Brampton, Ontario and Drumheller, Alberta. Along with three warehouse facilities, all locations ISO 9001:2008 certified, we continue to expand in order to support our growing North American customer base.

Ralston has introduced numerous innovative 'Firsts' to the industry. We were one of the first Canadian companies to manufacture garbage bags, UL Ecologo certified bags, and BPI Certified Compostable bags. This tradition continues today by constantly expanding our offering and delivering innovative products while allowing our customers to sell into new markets. Now, our Healthcare customers can take full advantage of our products, manufacturing strength and industry expertise.

THE RALSTON HEALTHCARE ADVANTAGE

Quality / Service / Consistency / Innovation

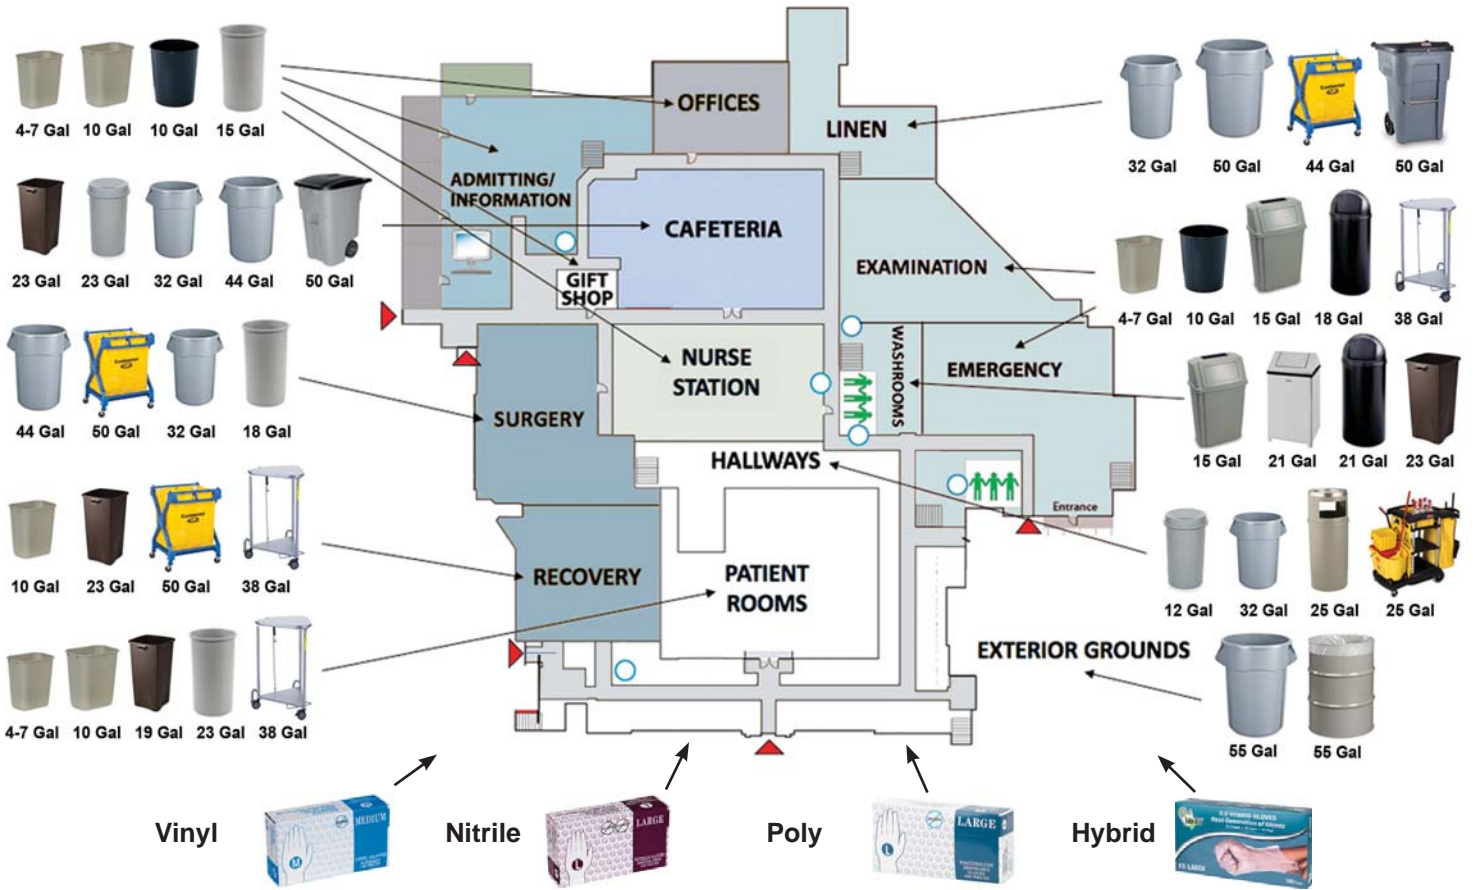

- Largest manufacturer of Can Liners in Canada
